

**Amendments to the Specification:**

**Please replace the paragraph beginning at page 5, line 8, with the following rewritten paragraph:**

In another aspect of the present invention, a method for controlling a ~~warming~~ warming device for a fuel cell system having a fuel battery and a power storage device is provided. The method includes: heating the power storage device to a preset temperature by using a first heating device in warming of the fuel cell system; and heating the fuel battery with a second heating device by using electricity of the power storage device after a temperature of the power storage device reaches the preset temperature.
